Front-End Developer enthusiastic about building fast, accessible, and modern web experiences. Proficient in HTML, CSS, JavaScript, and frameworks such as React.js. I specialize in developing clean, responsive, user-focused interfaces. Experienced in building and consuming REST APIs using Node.js and Express.

Highlighted Projects

Personal Portfolio Website

[Demo web](#)

React | TypeScript | Tailwind CSS | Vite

- Developed a personal website using React, TypeScript, Tailwind CSS, and Vite to display my tech stack and portfolio projects.
- Built a reusable component architecture, organized by views, routes, and context.
- Applied best practices in responsive design, semantic HTML, performance, and accessibility.
- Integrated Framer Motion animations to enhance UX without affecting performance

Rock Paper Scissors

[Demo web](#)

TypeScript | Node.js | Vite

- Developed a classic game using TypeScript, applying object-oriented programming, generic types, and code modularity.
- Leveraged TypeScript features like type aliases, interfaces, and generics to write a type-safe, maintainable codebase.
- Used Vite for the local development environment and build process.

API Rest Countries

[Demo Web](#)

JavaScript | Node.js | CSS

- Built a web application to explore countries using the REST Countries public API.
- Used JavaScript and Node.js to implement fetch requests, dynamic rendering, and navigation between country list and detail views.
- Worked with external data, DOM event handling, and applied responsive design

Quick Watch

[Demo Web](#)

JavaScript | Axios | CSS

- Developed an application that consumes a public API to display movie and series information.
- Used JavaScript and Axios for HTTP request handling, conditional rendering, and a user-friendly interface.
- Optimized visual performance and user experience while managing external data.
